

**ERROR CODES**

Include all errors used in each module that are specific to this system. This will insure consistency of errors between modules.

Example:

Error Description/Text
"Pay Plan NOT found, try again."

**INTEGRATE TEST EXCEPTIONAL CRITERIA**

List unusual text criteria that should be performed during Integration Testing.

**OPERATIONAL SCHEDULE AND SUPPORT**

A list of all the jobs with their dependencies, estimated duration, starting time, frequency, criticality and group who will be on call.

---

**Template Use Note:**

At the end of the Internal System Design Specification, paste a "link" to each Internal Module Design Specification.

To do this, for each Module Design:

1. Open, select and copy the entire Module Design
2. Open the System Design
3. At the end of the System Design document Edit/Paste Special.../Link the Module Design

After all the Module Designs are linked into the System Design, when you print the System design, you will print the entire Internal Design Specification.
