

**SUPPORTING TEST DOCUMENTATION (if necessary)**

<b>Application Name:</b>	<b>Customer Area:</b>
<b>Project Name:</b>	<b>Project Lead:</b>
<b>SR#:</b>	<b>Author:</b>
<b>Project Type:</b>	<b>Date:</b>

Supporting Documentation is used for test data, expected results, actual results that will not fit in the Test Plan matrix. For example, you may print a test data file as test data, log a session as actual results, or include a printed report as actual results. Label all supporting documentation according to its Test Feature and Condition (if necessary). Labels should cross-reference back to where the supporting documentation is mentioned in the Test Plan.

Test Data

Case III – Label contains bar-coded date in format: mm/dd/yyyy.

Test data file PAY000A contains:

Serial number = 00000001	Serial number = 00000010
Serial number = 00000002	Serial number = 00000011
Serial number = 00000003	Serial number = 00000012
Serial number = 00000004	Serial number = 00000013
Serial number = 00000005	Serial number = 00000014
Serial number = 00000006	Serial number = 00000015
Serial number = 00000007	Serial number = 00000016
Serial number = 00000008	Serial number = 00000017
Serial number = 00000009	Serial number = 00000018
