Test Phase Deliverables

There are five possible deliverables for the Test Phase: Test Approach, Test Plan, Test Support Reference, Supporting Test Documentation, and Test Summary Report. Together, these deliverables are called the Test Specifications.

TEST APPROACH

Application Name:	Customer Area:

Project Name: SR#: Project Type:	Project Lead: Author: Date:

Test Objectives

List test objectives and priorities. Objectives should cover FURPS (Functionality, Usability, Reliability, Performance, and Support).

Requirements

List all requirements for testing:

HARDWARE
(i.e., terminal, bar code reader, printer, personal computer)

APPLICATIONS
(i.e., Payroll, NTTA, etc (using test data file))

TOOLS

TESTING PARTNERS
Identify functional areas that will participate in the test. The area may be a customer (i.e., shipping) or a partner (i.e., Finance).

Constraints

List constraints against resources and requirements. (I.e., Payroll resources only available 1st three weeks of month – not last week because is pay period closing week.)
