TEST SUPPORT REFERENCE

Application Name:	**Customer Area:**
Project Name: **SR#:** **Project Type:**	**Project Lead:** **Author:** **Date:**

The Test Support Reference is a listing of Conditions that may need to be tested during support or maintenance of the system. It helps to associate the Conditions with the Test Features that need to be run to test the Condition. This can be used when looking for a specific Condition that you are changing and you need to know which Test Features to execute (e.g., if changing the quantity edit to except values up to 1000, you would need to run Test Features I.B. and III.B.)

Example of Unit Test :

Condition	Features	Risk Associated with each Condition
Accept order from the order entry screen.	I.A.	Medium
Validate the quantity	I.B., III.B.	High
Accept updates from user on invalid data.	I.C.	Low because . . .
